## 51<sup>st</sup> APACPH CONFERENCE EVENTS

20<sup>th</sup> and 21<sup>st</sup> November 2019

The APACPH Collaborating Centres for Health Promotion (APACPH CCHP) was established at Taipei Medical University, Taiwan to provide a mutual learning platform for enhancing capacity building and leadership in the field of health promotion.

APACPH CCHP identifies areas to build human capacity in the core competencies of health promotion and aims to strengthen capacity and knowledge of the health promotion workforce in the Asia-Pacific Region by disseminating health promotion principles, strategies, practices, and spreading evidence-based measures in the region. This time at the 51st APACPH conference, we organize a **pre-conference workshop** called **Health Promotion Core Competency, Innovations and Health Literacy** with co-organizers including Taiwan Health Promotion Administration and Thailand Ministry of Public Health. Furthermore, in collaboration with ThaiHealth, we also organize a **parallel session** called **NCDs: Success and Challenges** for health promotion experts in the Asia-Pacific Region to share their successful stories and the potential challenges with NCDs.
